Menlo Micro Announces Sales Agreement with Link Microtek

Irvine, Calif. – October 12, 2017 – Menlo Micro, the company responsible for re-inventing one of the most fundamental building blocks of electronic systems – *the electronic switch* – today announced that Link Microtek is now representing Menlo Micro’s product line in Europe. Link Microtek will help drive sales for targeted customers across Europe for Menlo Micro.

“We are pleased to have Link Microtek represent our technology and products,” said Lew Boore, Senior Vice President, Worldwide Sales and Business Development of Menlo Micro. “Link Microtek has a proven track record of reaching customers in our targeted customers in Europe, and we look forward to a long, mutually successful relationship.”

About Menlo Micro

Headquartered in Irvine, California, Menlo Micro is reimagining one of the most fundamental building blocks of electronic systems – the electronic switch. The company’s Digital-Micro-Switch platform is a game changer for those who design electronic systems, serving multiple industries including next generation 5G mobile networks, industrial IoT markets, battery management, home-automation, electronic vehicles and medical instrumentation. Menlo Micro is backed by GE Ventures, with investments from Corning, Microsemi Corporation, and Paladin Capital Group.
